Subject: IDL/PVWAVE/MATLAB comparison - opinions ?

---

Would much like to hear opinions of the main advantages/disadvantages of IDL/PVWAVE as compared with MATLAB for numerical problems such as solving diff eq. numerically, minimization, signal processing, fitting theory to data.

Are there any articles comparing the latest windows versions ?

(I have been using MATLAB for 7 years and I have a 10 min demo version of IDL but I find it will be impractical to make a reasonable evaluation in "reasonable" time).

Thanks,

Avi Ring, Physiology & Biophysics, Univ. Uppsala, Sweden.
