Hi,
How can I convert a long array with only one element to type scalar integer ?
I apologise if this is a FAQ.
Thanks,
Santanu

```
IDL> i = lonarr(1)
IDL> help,i
I          LONG      = Array(1)
IDL> i = fix( i(0) )
IDL> help,i
I          INT       =      0
IDL>
```

My second suggestion would be:

IDL> ?
