Good news for PVI and IMSL, but where does this leave RSI? And what about IMSL/IDL?

Boy, if you believe the "News Release" (read commercial), you would think that PV-Wave was developed by PVI.

I too wonder where this leaves RSI and IMSL/IDL. I'm also curious to hear of the behind the scenes offers and counter offers undoubtedly made to RSI by the IMSL folks ;-).

I know that IDL for the Mac will also be well received here. Hang in there.
