Subject: Including External Postscript fonts into IDL Posted by mila on Wed, 17 Jul 1996 07:00:00 GMT

I would like to annotate plots, images, etc. with fonts that are available as Postscript outside IDL, in particular foreign language fonts (ex. Arabic).

Any suggestions on how to get External postscript fonts or other methods to get in external fonts in to IDL (to use for 'xyouts', etc)?

Thanks, Mila Mitra mila@ecologic.net
