I've added a few IDL resources to my Web page at

<http://cimss.ssec.wisc.edu/~gumley/index.html>

Local content includes sections on:

- Using graphics frames,
- Displaying satellite data on a map projection,
- Reading HDF SDS data,
- "The Underground Guide to IDL" (something I wrote for local users).

Please browse around and let me know if you find any of it useful.

Cheers,  
Liam.

If you're willing to travel a little outside NY, there's an Intermediate Programming with IDL course scheduled Sep 19-21 in Vienna, VA (just outside DC on the Orange line). I guarantee there will be lots of programming.

<http://www.itvis.com/training/Description.asp?courseid=16>
