Hello guys,

I'am looking for IDL functions which can read and write TIFF formatted files. Does anyone know where I can find such functions or code in another language so I convert it to IDL.

Any suggestions are welcome,

Thanks, Rene.

Try if the idl tiff functions are sufficient for what you would like to do (they support only a subset of all tiff formats). See reference for `tiff_read` and `tiff_write` (RTFM). If you need more than that have a look at `libtiff` (c-interface) at <http://rushmore.JPL.NASA.GOV/~ndr/tiff>. You would have to supply the IDL interface yourself.

Hope this helps,

Christian
