Subject: 3D-text on PS
Posted by hatay on Thu, 17 Dec 1992 17:16:01 GMT

In a three-dimensional plot of mine I am plotting and
annotating all-three Cartesian axises. Titles and axis
labels are aligned with the axes when I view
the plot on X-Windows terminal.
When I switch the device to PostScript and chose a
PostScript font (!P.FONT=7) I can not have my annotations
aligned with the axes. (no angle other than 0-90-180-270
as a matter of fact).

Is there a way to use PS-fonts aligned with axes in
bizarre 3D plots?

I use IDL. Version 2.2.2 (IRIX mipseb).
