
Subject: Getting widget_button information
Posted by [fred](#) on Tue, 27 Aug 1996 07:00:00 GMT

Is there any function, similar to 'get_kbrd', or other, that
can tell if a widget_button was clicked?

I need a function that, after showing an image, could find if
was clicked other widget_button, before showing the next image.

Any sugestions to: fred@imagem.ibili.uc.pt

Thanx,
Fred
