idl.el (and have a look at idl-shell.el as well) is just what you want
(and more...). From the documentation:

```
:: The latest version can be obtained via anonymous FTP at:  
::  
::  
:: ftp://fermi.jhuapl.edu/pub/idl_emacs/idl.el  
:: ftp://eos.crseo.ucsb.edu/pub/idl/idl.el.Z  
::  
::
```

Best regards,

Christian
