: loadct,0

: tvscl,image

: What I want to do now is make an negative of this image.

loadct,0

tvscl,max(image)-image

Peter

Try these:

tv|ct, /get, r, g, b

r = reverse(r)

g = reverse(g)

b = reverse(b)

tv|ct, r, g, b

You might not want to reverse all color indices in order not to change fore- and background. You might also want to take of the color common block...

Hope this helps,

Chris.

How about

tv,255-byscl(image)

Cheers,
Liam.
