Subject: Slide\_Image (widget\_draw) Scollbar-Position? Posted by steinbr on Thu, 12 Sep 1996 07:00:00 GMT

Hello,

I started some days ago with idl, found very quickly a program in the library, but i need to adapt this a little bit.

slide\_image.pro

I need the Position of the scrollbars, or the upper\_left, lower\_right Coordinates of the scroll\_image.

I found the "WIDGET\_EVENT with a TYPE :3" means Viewport Moved, but the Region of the Viewport is not returned

And i want to position the scollbars from an event, i.e. horizontal\_start, vertical\_start.

Thanks for some help

Uli
