NT Problem.

I've been using the Linux version of 4.0.1 on Pentium and 486 PCs
and never had any lockups.

Yes, but no long file name support. But see the discussion on a related
thread.

You bet it does! I get time_tests of 4.1 secs with my new Pentium Pro 200. Beats the old UNIX box (SGI Indigo) by a factor of 7-10. I've also seen it run on DEC Alphas and Aspen Alphas with NT.

Cheers,

Joe Boardman
