idl.el, the emacs major mode for editing IDL/WAVE CL .pro files, now has a new home. The latest version (1.38) can be found at

ftp://scuttle.chmcc.org/pub/idl_emacs/idl.el

The only changes from 1.37 is updating of the ftp site and adding me as the maintainer. If you have bug reports and/or comments send them to me. I've let my lisp drool a bit, but I will do my best to address them as quickly as I can.

Happy IDLing!
Phil
