
Subject: xemacs and idl (idl-fill-paragraph?)

Does anyone get "idl-fill-paragraph" to work with IDL comment fields?

It appears not to change indentation unless there is a hanging indent character (and then it indents properly).

However, in either case I get the error:

"Symbol function definition is void: current-justification"

Worse, after executing the command 'idl-fill-paragraph' if I then execute 'idl-indent-subprogram', the entire program is commented!

I am using Xemacs 19.13 and idl.el 1.38.
