---

I'm working with IDL. Version 4.0.1 (AIX ibmr2) on a UNIX Sistem.  
I've developped some routines by myself and I would use them not  
localy!, I'd like to put all my routines in a directory and then  
call and compile everyting from everywere in my filesystem.  
Can anyone help me?

PS In my filesystem I can't use the superuser permission, so I can't write anything in the main IDL  
lib directory!!!.

Thanks in advance.

My best
