Hello,

I have to prepair some figures for a paper where they accept graphs only with tick marks and not grid lines. Is there a way to tell PLOT to draw a continuous line with tick marks?

PSYM is not what I want I would like to have something like

```
--*
 \
  \ /
   *---*
```

Thanks!

Best regards,

Roberto

Just use PLOT with PSYM but set the PSYM value to a negative value.  
Then you get the line with the symbol at the data point.

e.g. PLOT, x, y, PSYM=-4

will give you the line with diamonds (?) symbols at the data points.

cheers,

paulv
