Research Systems is pleased to announce that IDL 5.0 is shipping. IDL 5.0 is now available for Unix, VMS and Windows. The MacOS version of IDL 5.0 is currently available in Pre-Release format, with final commercial release projected for the end of May.

We extend our thanks to all customers who participated in IDL 5.0 Beta Test and Pre-Release programs. Your hard work, comments and feedback have contributed significantly towards making version 5.0 the most robust, highest performance version of IDL ever released. We recommend that you completely remove your IDL 5.0 Beta or Pre-Release installation before installing the final release version of IDL 5.0. Refer to the file rel_note.txt in the /info directory of the IDL 5.0 CD-ROM for details.

If you would like more information about IDL 5.0 visit our web site at www.rsinc.com or contact your local IDL representative.

Dave Uhler
IDL Product Manager
