Sorry.. I did exactly the same thing that David did (I think we posted about the same time.). My example doesn't set up a CW_PDMENU menu widget, only a WIDGET_BUTTON with /MENU option widget.

(but good luck anyway)

Thank you, all!

I learned much about cw_pdmenu!

I did a change to cw_pd_menu_EVENT, {ID:ev.id .

Now event.id will be the id of the widget_button which was used to create the menu.

```
function cw_pdmenu_EVENT, ev
  WIDGET_CONTROL, ev.id, get_uvalue=uvalue
  return, { ID:ev.id, TOP:ev.top, HANDLER:0L,value:uvalue
}
  =====
end
```

Later I'll go to use Stein Vidar's routines, they are great!
