I'm running v5 on a 133MHz pentium, 32Mbytes and win95.

So, the other day I opened insight, and loaded 6 surface plots onto the display (using the view menu). And it was very slow. Am I overambitious, do I need the 500MHz dec alpha pc, or something else?

Otherwise, insight seems to be a nice tool, although still needs some improvements. But later on that.

mirko
