Hi,

Insight will not fit in my plans using idl.

The reasons are:

- 1) I am able to change the data belonging to a plot and the plot did not change itself to the new dataset!
- 2) It isn't possible to save the style of the plot to an independent IDL Source which could be altered by me!
I like to have as result an idl Source Script and the postscript file!
- 3) It will duplicate the data I used for the plot!
- 4) It could not read scientific data formats like netCDF or store to them!
- 5) There is still not yet a legendtool available!
