Subject: AUTOCAD -> WAVE
Posted by mcgehee on Fri, 07 May 1993 17:26:01 GMT

Aloha,

 Does anyone know of WAVE or IDL procedures for importing 3-D
wire frame data from AutoCAD?

 We want to animate wire-frame models of parts of our telescope
structure in response to data retrieved from a distributed real-time
database system (EPICS). I have a demo working that uses the Earth globe
used in the WAVE show_anim demo but the requirement is to see a 3-D cartoon
of the telescope rotate.

Thanks,
 Peregrine
