Name: David Fanning
E-mail Address: davidf@dfanning.com
IDL version: { x86 Win32 Windows 5.0 Apr 28 1997}
Platform and OS: WindowsNT 4.0, Service Pack 1

Description of Problem:

The XBM_Edit program does not work at all on my platform
under IDL 5.0. It appears to be alive (at least the
DONE button works), but that is about the extent of it.
I realize this is a library routine, but it is one I
use frequently for making button icons.

Known Workarounds:

Use IDL 4.0.1 to create BM definition files for
IDL 5.0 programs.

RSI Technical Support Response: Pending
