Subject: How to read MJPEG files into IDL Posted by Stefan Siegel on Wed, 25 Jun 1997 07:00:00 GMT View Forum Message <> Reply to Message

Hi there,

did anybody write a IDI routine for reading a MJPEG file (captured from a CCD camera using a miromotion DC20 frame grabber card) into a 3D array within IDL?

I also appreciate any hint on where to find information on MJPEG or source code for reading such files.

Stefan
