Hi !

I have a problem with some "sticky dimension in a matrix. The thing is that if you make something like:

```
a=findgen(4,1000)
b=fltarr(2,*)
```

the array I get is an [1,1000] array, and I want an [1000] array !!!
Does someone know any way of getting rid off that "1" dimension.
(OK, I know the "for" loop method, but, there's no other method to do it
?)

Thanx.
