Subject: 2 quick IDL Widgets questions...

Hello, IDL Users -

I'm running IDL 2.4.0 under Ultrix 4.1. A couple short questions:

What controls the background color for widgets? Is it in the Xdefaults file? The same application has a blue background in one account, and white in another.

How can I prompt an exit from IDL from the widget level? Just putting EXIT in the event handler gives me a callback error, although it works fine for non-widget routines.

Thanks,
