Can anyone help me!
When I print out one of my 3-D plots the colour is all red, it is not
like this on the screen output. Does anyone no why this maybe.

Many Thanks

Neil Winrow

This is the classic symptom of sending an 8-bit image to
a 24-bit display device. But it is difficult to know
specifically what your problem is without knowing how
your PostScript device is configured and how you are
creating your PostScript file.

Cheers,

David
