Over 1,000,000 satisfied customers since 1984.

Let a computer reverse your tobacco habit. For Good! LifeSign works  
because it slowly and gradually decreases your dependence on nicotine  
by reversing the process that got you hooked in the first place. No Cold  
Turkey! With LifeSign, you keep smoking until you quit for good. Your  
body is not thrown off-balance, because you alter your behavior pattern at  
the pace that works best for you. Unlike the nicotine gum and patches,  
LifeSign is safe and natural. No Drugs!

Quitting with patches or gums will cost you over \$300

Life sign is a fraction of that cost and MUCH more effective

How The LifeSign Program Works

During STAGES 1 and 2:

You'll use the Monitor called "LifeSign." In the first stage, you'll push LifeSign's  
SMOKE button to record your smoking habits-how often you smoke and when  
you smoke. LifeSign uses this information to form your  
personal quit plan. STAGE 1 takes 7 days.

During STAGE 2:

LifeSign helps you to follow your quit plan and to withdraw slowly  
and easily from cigarettes by telling you when you can smoke  
Lifesign withdraws you slowly but cutting down  
the amount you smoke everyday until you smoke no cigarettes  
NO MORE CIGARETTES

## WITH LITTLE WITHDRAWAL

STAGE 2 can take from a little more than a week to about 28 days depending on your smoking habits.

During STAGE 3:

You'll find out what many ex-smokers know: "There is life after cigarettes." This Guide helps you to start a life in which you feel better and more in control of your health and your future.
