Hi PV-Wave folks,

I got problem when I used FINDFILE to locate a file in certain directories. Sometime, when I used it, an error messages like:

```
% FINDFILE: Error managing child process.  
  Resource temporarily unavailable  
% Execution halted at FILE_SEARCH <file_search.pro( 14)> (FINDFILE).  
%   Called from TEST <test.pro( 10)>.  
%   Called from $MAIN$ .
```

Is there any way to avoid this ? Any help would be greatly appreciated.
Thanks.

Cheers,

KP Wong

Hi PV-Wave folks,

I'm sorry that I didn't mention the platform I am using. The system
I'm using is Sun4 Solaris Sparc and the PV-Wave version is 5.00. My
displaying terminal is NCD 8-bit Color X terminal. Thanks.

Cheers,

KP Wong
