Hi,

Developing Java GUI on WinNT for the database application (Oracle, HP-UX on server).

1) Can anybody tell which ORB is better suited for that purpose (simple, popular, inexpensive, include both Java/NT and C/C++/Unix part) ?

2) Do I have to buy both Java and C++ ORB ?

3) Which Java IDE supports CORBA best (Java IDL, etc.) ?

Thank you in advance,
Oleg.
