Its a bug in IDL 5.0. Upgrade to IDL 5.0.2.

For more information - and a workaround in case you are not able to upgrade - see David Fannings IDL 5.0 reports.

If the bug you are referring to here is the one where setting the value for a widget label causes the whole widget to "grow", then I don't believe this bug is fixed in IDL 5.0.2. I have just upgraded and am very disappointed to see that the bug remains.

Dave
