Hi,

I got in a bit of trouble on idl5.0 RS 6000
if I use these Routines to resize a draw widget
from xsize 50 and ysize 30 to the new sizes xsize 30 and ysize 50
and later back to the old one

```
widget_control,map.page_id,draw_xsize=30  
widget_control,map.page_id,draw_ysize=50
```

The whole widget where this draw_wid is embbeded becomes bigger and
bigger in y direction.

What's wrong?
