Hi,

the function gethelp() will produce this error if obj_new() was used.

Did someone have an updated version of gethelp?

```
% STRING: Object reference expression not allowed in this context:
VVALUE.
```

```
% Execution halted at: MAKEHELPSTRING   248
```

```
  /usr/local/idl/idl/lib/obsolete/gethelp.pro
```

```
%              GETHELP      457
```

```
  /usr/local/idl/idl/lib/obsolete/gethelp.pro
```

```
%              GETHELP      407
```

```
  /usr/local/idl/idl/lib/obsolete/gethelp.pro
```

```
%              $MAIN$
```
