Hello again

Just in case you might be interested in the solution of the SPAWN problem I mentioned, here is it (thanks to John Mariska <mariska@aspen.nrl.navy.mil>)

I had the same problem with idl 5 on a Win95 system. I finally discovered that you need to put the top IDL directory in a path statement in your autoexec.bat file:

```
set path=%path%;c:\rsi\idl50
```

Discussions with RSI confirmed that this is not required in the documentation, but is necessary.
