Subject: Plug-in for triangulate Posted by hahn on Thu, 11 Dec 1997 08:00:00 GMT

Hi,

I have irregular spaced grids with data that I want to visualize with Insight. I assume I have to triangulate the x/y vectors to make a regular grid and interpolate the data upon it.

Has some kind soul already writte a plug-in for Insight or am I the one to invent this reel?

Norbert
