idl.el

is an Emacs major mode for editing IDL and WAVE .pro files.

idl-shell.el

is an Emacs major mode for interacting with an inferior IDL process.

Both modes momentarily do not have a maintainer.

To preserve their internet accessability, the recent versions are supplied at

<ftp://pivory.mpae.gwdg.de/pub/idl/>

http://www.mpae.gwdg.de/mpae_RZ/software/idl/emacs/

For more information, see

http://www.mpae.gwdg.de/mpae_RZ/software/idl/

If you would like to maintain one of these modes or both, please do.
