Hello,

I am converting sources with IDL widget-functions into PV-WAVE environment.
Does somebody has an experience/information on this job ? Any comments,
suggestions are welcome for me.

Functions I have to manipulate are: May corresponds to (not sure):

[IDL widget]	[PV-WAVE widget]
Widget_base()	WwInit() ? WwLayout() ?
Widget_button()	?
Widget_text()	WwText() ?
Widget_list()	?
Widget_label()	?
Widget_draw()	?
Widget_slider()	?
Widget_control()	WwMainWindow()
