Hi all,

how can we plot one headline/title in a multiplot window (36 boxes) w/
Direct Graphics ?

should be something like:

```
!P.MULTI = [0,1,1]
xyouts, 0.,0.98,headline,/NORMAL
!P.MULTI = [0,6,6]
for i = 0, 5 do begin
    for j = 0, 5 do begin
        plot, data[i,j,*], ...
    endfor
endfor
```

Shall we define two windows frames?

Cheers, Roger
