These are two different systems, completely. It *all* needs
to be re-coded.

> I would appreciate any advice you may give.

Pretend your boss told your office mate to do it. :-)

Cheers,

David

 I personnaly found the IDL widgets considerably easier to use than the
PV-Wave ones
and was able to write a small (ok trivial but it proved the point to me
and others) demo
very quickly.

PS. I like David Fannings comment in his reply 'Pretend your boss told
your office mate to do it. :-)'
i'll remember that one !
