Subject: button position

I would like to create a row base with one button on the far left and one button on the far right. I can't seem to figure out how to use /align_left or /align_right properly. I do not want the buttons side by side.

Cathy

I guess this qualifies as an "ugly hack", but you could put an empty base of the appropriate size between the two buttons. Assuming that the 2 buttons were of the same size, the following worked for me on 5.0.2 (HP-UX) and 5.0.3 (VMS):

```
a = WIDGET_BASE( SCR_XSIZE=500, /ROW )
```

b1= WIDGET_BUTTON(a, VALUE='B1')

g1= WIDGET_INFO(b1, /GEOMETRY)

a2= WIDGET_BASE(a, SCR_XSIZE=(500-2*(g1.SCR_XSIZE+2*g1.MARGIN+g1.XOFFSET)))

b2= WIDGET_BUTTON(a, VALUE='B2')

WIDGET_CONTROL, a, /REALIZE
