Hello,

i got 3 Answers at my call for IDL-Language-Mode for NEDIT 5.0.
the forth sent me some code.

Ok, I got no sufficient help: So here is my first version of it.
I looked into the other Modes and tried to learn something about
RE (there are books completely about RE)...

... and computed this:

```
# Preferences file for NEdit
#
nedit.highlightPatterns: C:Default\n\
NEdit Macro:Default\n\
IDL:1:0{\n\
  comment:";":"$":Comment::\n\
  string:"(\""|"')":"'('"|'")":String::\n\
  numeric constant:"< ((0(x|X)[0-9a-fA-F]*)|(((0-9)+\\.?[0-9]*)|(\\. [0-9]+))((e|E)
(\\+|-)?[0-9]+)?)(L|l|UL|ul|u|U|F|f)? >":Numeric Const::D\n\
  keyword:"< (pro|function|return|goto|if|then|endif|else|endelse|case|of
|endcase|default|while|do|for|endfor|repeat|until|endrep|beg in|end) >":Keyword::D\n\
  braces:"[{}]"::Keyword::D\n\
  operators:"<(mod|and|not|or|xor|eq|ge|gt|le|lt|ne)>":Keyword::D\n\
  idl commands:"<(print|tvscil|tv|window|wait|wdelete|xyouts)>":Keyword::D\n\
}
nedit.languageModes: IDL:.pro::::\n\
```

it does not work complete but other freaks may complete my work!

Greetings to the Coyote
