Subject: color .ps/gamma_ct Posted by Peter Gallagher on Fri, 23 Jan 1998 08:00:00 GMT View Forum Message <> Reply to Message Hi all, I'm trying to plot two images in one Postscript file using the same color table. The only problem is that I want to apply a different gamma correction to each image. Something like ... LOADCT, 3 TV, image1 GAMMA_CT,.7 TV, image2 GAMMA CT,.3 The GAMMA_CT changes the appearance of both the images each time it is applied - I want a separate gamma correction for each image. Any body come up against this problem before? Peter.
