Hello all, I'm just starting, but I've come unstuck already. I'm trying to write a for .. do begin line, but I can't seem to get it to work:

```
for i=0, 31 do $
  for k=0, 31 do $
    for j=0, 255 DO BEGIN
      real_b(i, k, j)=b(i, k, 2*j)
      imag_b(i, k, j)=b(i, k, (2*j)+1)
      print, i, k, j
    endfor
```

In desperation I've tried the following:

```
for i=1, 100 do begin
  print, i
endfor
```

and all that happens is that I get 101 printed, then a syntax error on the 'n' of endfor. What have I done wrong?

Martin
