 Jose Miguel Prellezo Gutierrez 
 Perellezo@atc.unican.es> wrote:

 I have an ASCII file with 3 columns, which represent the x, y, z samples
 of a non-uniform grided surface. There are about 1500 points. How can I
 plot the surface with IDL?

 I tried KRIG2D, but it's too slow.

 Thank you for any tip!

In similar situations I use triangulate and trigrid.

good luck,

mirko vukovic
