Hi all,

I have problem with restoring a file which was saved using IDL(v5.0).

I tried to restore it in PV-WAVE, but PV-WAVE gave the following messages:

% RESTORE: Obsolete SAVE/RESTORE file: . Use WAVE3_RESTORE.

% Execution halted at \$MAIN\$ (RESTORE).

I did try to restore the saved file using WAVE3_RESTORE according to the instructions in the error message, but error is still exist:

% Internal error: check_ref_list: bad structure.

I wondered if there is any routine out there which can restore IDL's saved files in PV-WAVE, or if there is any routine that can saved an IDL session variables (for example) and can be restored in PV-WAVE later on. Any clues are most welcome !!!

Thanks you very much !!

Pong.
