Hi,  
I am having a similar problem displaying data received  
over a socket, using IDL v4 {IDL. Version 4.0.1c (sunos sparc).}.  
If it becomes more than a "tickle" could you please send a pointer  
on where find more info on the IDL v4 and "Interrupted System Call"  
error mode?

Thanks,  
Mike <MRFitz@ns.arizona.edu>
