Does anybody nows where to find information about the new
features of IDL 5.1. I've been looking at the RSI web page...
But there's very little there.
I am specially interested in Active X and in the improved large
scale matrix manipulation.

I am on the maintenance and technical support. I got the CD, book, but
not the license information, nor password. I called, emailed, they said
I will get them soon, but still haven't yet. Do you know the reason?

Thanks
