I can heartily recommend David Fannings courses - I just attended one here in Oslo last week (Hi, David! Hope you're not stuck for too long in Denmark!) Even though most people on the course had been programming IDL since 1991 or before, there was no shortage of things to learn. It's fun watching your colleagues getting excited in a computer class!

If you factor in the cost per hour spent learning object oriented graphics, the single day we spent on object graphics probably saved me more time/money than the cost of the course. So I would definitely recommend the course, especially for anyone who will be doing object oriented graphics in the future. Try to get a not-too-diverse audience on the course; that means more value for money for everybody.

Regards,

Stein Vidar Haugan
