Hi,

Who of you is already using maps in the hires mode?

Did you already have seen that's there are some isle cutted in pieces
by unnecessary lines?

e.g.

```
map_set,limit=[53,5,57,15]
map_continents,/hires,/fill,color=10
map_continents,/hires,color=100
```

I know myself from older Versions that this failure is in maps from 1995
too.

Always no update available?
