
Subject: Animated Gif Tool?

I saw a posting the other day regarding the write_gif /multiple statement. And it reminded me that I wanted to ask if anyone had written a util to take some raw data files or gifs or whatever and make one big animated gif out of them.

Preferably, I would like to work with files and not from one huge volume of data in memory.

Thanks,

Matthew Sheats

I have good experience with ULEAD gif animator which someone suggested to me in this and some other newsgroup
(http://www.ulead.com/cool3d/ga1.5/ga_main.htm)

Martin.

Do you mean Gif89? Gifcon can constuct multiple gifs to single animated gif.

Well, the reason I posted to this news group is that I wanted something
written in IDL because of the work that must be done on the images
before converting them.

I looked up the 89a format and am going to write it myself. Won't be
hard.

Thanks for the input though.
