Yes, my great boss come up this idea that lengthes of the islands I just

filled in and measured of their areas are what really important.

So can anyone tell me how to measure a length of some contour?

Thank you in advance;)

By the way, I try to run the IDL 5.1 (yes, I pay the price) and

I found that the "Insight" act so slowly on my poor PC,

133Mhz pentium, 32 Mb. window 95
